

800,000

individuals are hospitalized because of a slip, trip, or fall injury

1 out of 5 slip and falls results in a serious injury

Slip and fall causes

Prevention Tips

Conduct floor and walkway audits both inside and outside of the restaurant.

Ensure any walkway hazards are promptly corrected.

- Snow and ice accumulation on parking lots and walkways
- Moisture build-up in lobbies
- Improperly placed floor mats

If floor mats are used, inspect regularly to ensure edges remain flat and don't become a tripping hazard.

Consider contracting with a licensed third party for snow removal and salting.
